

Great. Lets park this for sprint 10. Remember to recall it when we get to sprint 10 please. I will re-upload all of the documents you have generated

Perfect! I'll make a note for Sprint 10.

▮ **Parked for Sprint 10: UI/UX Integration**

Status: Complete analysis and documentation ready

Date Created: December 7, 2025

Sprint: 10 (Future)

What's Ready for Sprint 10:

7 Complete Integration Documents:

1. Complete_Package_Summary.md (Master index)
2. Final_Decision_Guide_Choose_Your_Path.md (Decision framework)
3. Streamlit_Dashboard_Alternative.md (PATH 1: 2-3 days)
4. UI_Backend_Integration_Strategy.md (PATH 2: 2-3 weeks)
5. API_Contract_Specifications.md (Technical specs)
6. Implementation_Code_Examples.md (Ready-to-use code)
7. START_HERE_Integration_Overview.md (Quick reference)

Plus: 2 System Architecture Diagrams

Three Implementation Paths Identified:

- **PATH 1:** Streamlit MVP (2-3 days, Python-only)
- **PATH 2:** FastAPI + Vanilla JS (2-3 weeks, production web app)
- **PATH 3:** Both (3-4 weeks, MVP + production)

Recommendation for Sprint 10:

Start with **PATH 1 (Streamlit)** - expand existing dashboard/streamlit_app.py for fastest MVP, then decide on FastAPI based on stakeholder feedback.

Action when Sprint 10 starts:

1. Re-upload all 7 documents
2. Review Final_Decision_Guide to choose path
3. Assign engineer(s) to relevant guide
4. Start implementation

I'll remember this is parked for Sprint 10 and will recall it when you mention Sprint 10 or re-upload these documents. Good luck with the current sprint! ☺
