

Issues raised by Consultants - SLMOI/CRES/DMC/C/QCBS/137

No	Item No/Page number	Clauses or Issues raised by Consultants		Clarifications to issues
1	Human Resources – Personnel List & Man-Months Table	Page 88 (Point 45 – Technical Experience and Expertise) and Page 97 (Projected Man-Month Requirement) list slightly different experts. For example, positions such as GIS Specialist, Geospatial Consultant, and Vulnerability Assessment & Penetration Testing Specialist appear in one section but not in the other. e.g., GIS Specialist, Geospatial Consultant, Vulnerability Assessment & Penetration Testing Specialist) appear in the technical experts section but not the Man-month requirement table.	Could you please confirm which expert list should be considered authoritative for finalizing the proposed team? Additionally, are bidders permitted to adjust the proposed man-days and modify the composition of key experts (while remaining consistent with the ToR and Scope of Work) to best deliver the assignment?	The list of experts provided under Technical Experience and Expertise shall be considered the authoritative reference for the required professional categories. The Projected Man-Month Requirement serves as an indicative guide to the estimated level of effort. Bidders are permitted to propose adjustments to man-days and team composition—provided that: •All core competencies required in the Terms of Reference (ToR) are adequately covered; •The overall approach remains consistent with the objectives, scope, and deliverables of the assignment. •Pls consider the Human Resources. Staff allocation ref to the scope of project
2	Technology Stack	Is there a mandated technology stack (e.g., programming languages, frameworks, cloud platform, or database) for developing the DSS, or may bidders recommend the most appropriate stack based on best practices and contextual suitability?		There is no specific technology stack mandated under the Terms of Reference (ToR). Bidders are encouraged to recommend and justify the most suitable technology stack covering programming languages, frameworks, cloud platforms, and databases based on: •International best practices for

3	ERP/ARP Integration	Could you please specify which ERP/ARP systems (if any) the DSS is expected to integrate with, and the scope of this integration? Are there existing systems being used by DMC, or is a new one to be proposed and created under this project? This will help us assess interoperability and propose suitable integration approaches.		Currently, there are no specific ERP or ARP systems in active use at the Disaster Management Centre (DMC) identified for direct integration under this assignment. The reference in the ToR is intended to ensure that the Decision Support System (DSS) is developed with future integration capability in mind. Need to address information management, Disaster Inventory Management, contact management and expels bidder need to proposed proper DSS Solution for the Disaster Management. The proposed system architecture should also consider and outline a plan and implement to ERP/ARP systems can be incorporated in the future to support the overall operational, logistical, and administrative needs of the Disaster Management Centre.
4	Certification Requirement	Are there any mandatory certifications required for the proposed experts (e.g., PMP, security certifications, education certifications), and should this be submitted along with the proposal?		Please refer the TOR
5	User Engagement – Mobile App	The ToR emphasizes engagement of multiple-user groups and stakeholders. Is the development of a mobile application included in the scope of the DSS to facilitate multi-stakeholder access and engagement?		Yes
6	LLM Component	The ToR mentions several AI-driven LLM components to enhance decision-making. Are interactive LLM components expected to be included (i.e., chatbots, automated report or analysis generation)? Are these expected to be primarily in English or also in Sinhala and Tamil?		Your proposal, suggest latest technology for future use
7		In which digital format(s), historical data stored ? E.g. CSV, PDF etc.. This is important for us to identify the scope of data migration .		After the inspection, please propose a better format.
8		What information is expected under the line item mentioned in page 36? "Participation by nationals among proposed Key experts"		Refer to the TOR and propose a similar experience.
9		Submission date extension till 17th Oct 2025.		The submission deadline was extended upto 16th Oct. 2025
10		Mismatch between TECH-4 vs Form TECH-4 (For full technical Proposal only)		Refer to the TOR and submit your full proposal.
11		The requirement is for software with a warranty period of 8 years.		Please refer to the Addendum 1

	General	1.Based on the specimen price schedules in the RFP, it appears that only professional service costs are considered, with no provision for other technical costs. 2.However, it is anticipated that backend software licenses (e.g., database and GIS licenses) may be required both during development and in the production stage. 3.The current RFP does not clearly specify whether these license costs should be included in the proposal or if they will be procured later through separate tenders. 4.If such costs are to be included, accurate estimation is not possible at this stage without proper architectural design and sizing. Please clarify?		
	Section 7. Terms of Reference Page 80 Clause F	Scope of Work and Tasks The consultant shall provide 8 years warranty for DSS software including updated versions and 8 years warranty for hardware and all accessories.		
	Section 7. Terms of Reference Page 84 Clause 42	Deliverable 6/Task 6: Operationalized the DSS and Testing: (4 weeks) The consultant shall assist DMC in operationalizing DSS. Finally commissioning of the respective solutions and 5 years (Five) maintenance and ensure long-term sustainability of the API DSS solution.		
	Section 7. Terms of Reference Page 98 Clause 15	Service Agreement for eight years		
	Section 7. Terms of Reference Page 143 46.2/3	The payment schedule: Support and Maintenance for 3 years		
			1.Please confirm if the 8-year warranty applies to the entire DSS solution (software, hardware, accessories). 2.Support and maintenance periods are mentioned as 3 years, 5 years, and 8 years in different placed in the RFP. What is the correct duration required? 3.If the warranty is for 8 years, should support and maintenance also extend for the same period, or not?	* The current price schedules are based on professional service costs and include Application Development Cost with a Five (05) Year Comprehensive Warranty, as specified in the RFP and the Addendum provided. *Software license and hardware equipment costs are not to be considered at this stage. These components will be procured separately in the second stage, as part of another procurement process, * Ref the RFP *Section 7. Terms of Reference Page 80- Change to 5 Years Comprehensive warranty for all solution

	Section 2. Instructions to Consultants - Data Sheet Page 35 Clause 21.1 Sub Clause 3	Key Experts' qualifications and competence for the Assignment 3.1 Team leader / Project Manager 3.2 Project/ Business Analyst 3.3 System Architect 3.4 UI/UX Designer 3.5 Software Developer 3.6 Database Administrator (DBAs) 3.7 API Designers 3.8 Quality Assurance (QA) Engineer 3.9 Security Specialist 3.10 GIS Specialist	Although the following resources are mentioned under Technical Experience and Expertise, they are not listed as Key Experts in ITB21.1 – Evaluation of Technical Proposals: -AI/ML Specialist -Subject Specialist -Geospatial Consultant -DevOps Engineer -System Administrator -API Designer Could you please confirm whether the above roles will be considered as Key Experts? If they are to be considered, kindly clarify how the points will be allocated.	* The above roles may be considered as Key Experts based on the bidder's proposal. However, in line with the bidder's proposed approach and the project requirements, the qualifications and experience of these experts may be evaluated as part of the overall team capacity and technical approach of RFP
	Section 7. Terms of Reference Page 98 Clause 15	Projected Man Months (MM) Requirement.	The Man-Month (MM) requirement and the number of people required have not been specified for the following categories: -AI/ML Specialists -Subject Specialists -Geospatial Consultants Could you please provide the MM requirement or the number of people required for each of aforementioned categories?	* Please refer to the RFP and the Addendum for guidance.

	Technical Experience and Expertise-> Personnel Page 88 to 96 & 97 to 99 Clause 46	Technical Experience and Expertise- Personnel	It is noted that some of the roles listed under Clause 45(Pages 88 to 96) are not exactly mapped to the roles tabled under Clause 46(97 to 99), with a few role name variations as follows: Software Architect (Clause 45) vs System Architect (Clause 46) Front-End Specialist (45) vs UI/UX Designer (46) Software Engineers / Back-End Developers / Mobile API Developer (45) vs Software Developers, Backend Developers, API Designers (46) Data Engineers (45) vs Data Engineers + Database Administrators (46) VAPT Specialist (45) vs Security Specialist (46) Further, Clause 45 includes roles not listed in 46 (AI/ML Specialist, GIS/Geospatial roles, Subject Specialist), while Clause 46 introduces roles not in 45 (Tester, System Administrator, Data Entry Operators, Data Collectors)	* Please refer to the RFP and the Addendum for guidance and propose your solution accordingly.
	Section 7. Terms of Reference Page 92 & 94 46.2/3	Geospatial Consultant (Page 92) and Geospatial Engineer (Page 94) “15+ years of proven proficiency in Experience with GIS Software Expertise, Spatial Data Analysis, Programming and Scripting, Web Mapping and Domain Knowledge. BSc in Computer Science and Masters qualification or higher qualifications.”	It is recommended to relax the rigid requirement of a BSc in Computer Science for these roles and instead recognize GIS-related higher education qualifications. This adjustment will not only align better with the specialized nature of geospatial work but will also broaden the pool of qualified candidates, thereby reducing barriers to competition.	* Please refer to the RFP and the Addendum for guidance and propose your solution accordingly.
